ABOUT ME

I graduated from Adeleke University, Ede, in 2026 with a Second Class Upper degree in Economics and a CGPA of 4.36, with a solid grounding in microeconomics, macroeconomics, econometrics and public finance. Alongside school, I completed my ATSWA examinations and am now an associate member of the Association of Accounting Technicians West Africa, working toward professional membership of the Institute of Chartered Accountants of Nigeria (ICAN), which has given me practical accounting and financial reporting skills to go with the economics theory.

Until January 2026, I worked as a Data Analyst at Centrepont Supermarket, turning inventory and sales data into decisions the business could use. I also served as Treasurer of the Nigerian Economics Students' Association (NESAAU), Adeleke University chapter, for the 2025/2026 session, managing the association's finances and reporting to members. I'm organised, I follow through on things, and I'm looking for a service year where I can put my economics and accounting background to proper use.
